

LIFT TABLE SKIRT

www.industries3r.com

Lift table skirts help secure equipment by limiting access to pinch points. It can also extend the life of equipments by minimizing dust and dirt accumulation in the mechanism.

Maintenance strap: Facilitates the maintenance of the unit (keeps the protector open at the top of the table)

Welded or sewn joint: Solution best suited to the application (sealing, small retracted, etc.)

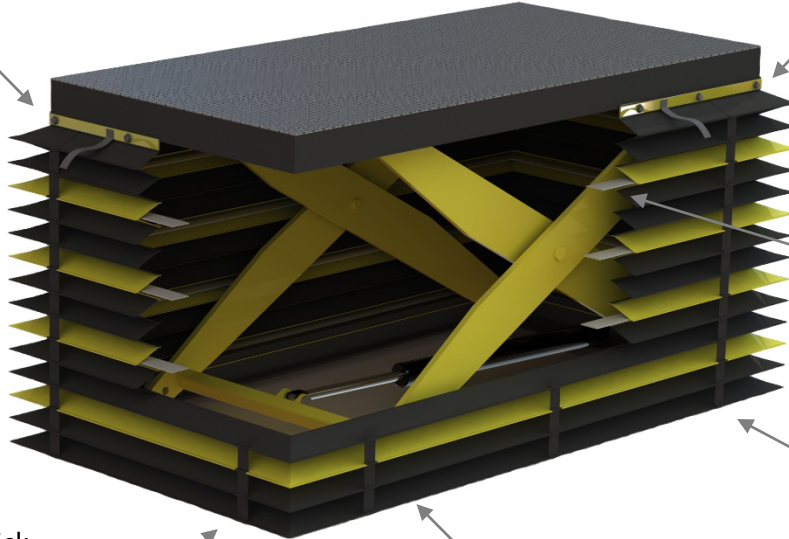

Flange with hem: Reduces premature seam wear. Quick and easy access under the table for maintenance

Collar: Allows bolt installation

Reinforcement: Gives rigidity to the protector

Tie strips: Reduces premature seam wear

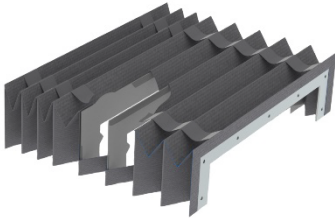

Fabric: Wide range available to suit the application

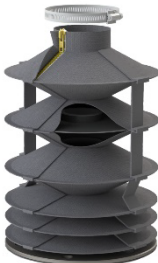

Also available :

Lathe covers

Rail cover

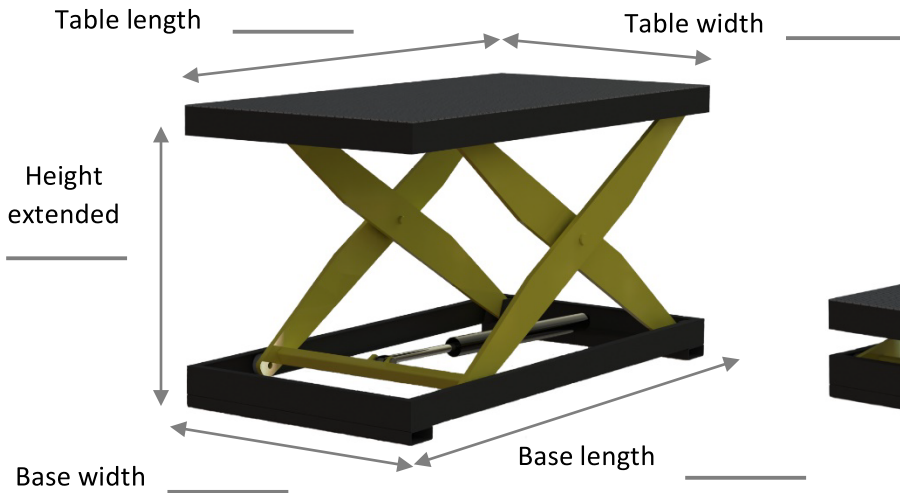

Cylinder and rod boots
