3R1135

NYLON

Made from nylon re-twisted threads, this fabric can be coated with high temperature red silicone to enhance its sealing. Also, the twill weaving increases the abrasion resistance and reduces fraying when cut. A heat set treatment is also applied to stabilize the material.

APPLICATIONS

The 3R1135 is designed for the fabrication of pipe sleeves between aspiration lines and vibrating sifters. It also is a really good reinforcement material for chute linings that transfer abrasive materials.

SPECIFICATIONS

Physical properties

Yarn	Filament nylon warp and filing
Weave	2/2 twill
Weight (oz/yd²)	14
Width	60"
Finish	Scoured & heat set
Air Permeability	5 to 10 cfm
Temperature	135°C (275°F)
