3R1220AL

SILICA

The aluminized silica fabric is a flexible textile which may be employed at high temperatures, it offers excellent thermal insulation value across a wide temperature spectrum and exhibits good chemical resistance.

APPLICATIONS

The 3R1220AL is used in the fabrication of insulation pads in the treatment of metals and for equipment protection. The aluminized side is used to reflect the radiant heat. It is also useful for equipment and machinery protection.

SPECIFICATIONS

Technical Data

Width	36"
Weight	36 oz/yd ²
Thickness	0.055"
Metalized polyester film	0.001"
Temperature	980 °C (1 800 °F)
Temperature of aluminized film	230 °C (450 °F)
Content	96% silica (minimum)
Weave	Satin
