3R3004

GRAPHITE FLAKES

Extra fine graphite particles for use in precision equipment with extremely close tolerances. The 3R3004 is an excellent electrical conductor and its granulometry is inferior to 325 mesh. It is available in a plastic can with a tight cover.

APPLICATIONS

This material is recommended for cameras, firearms, locks, bearings and fishing reels. It can also be used in the fabrication of electrical conducting material and in electroplating to coat non-conductive objects. However, it is not to be used in ignition switches or other electrically operated locks.

N.B. The information, details and values indicated are to the best of our knowledge. We recommend to conduct tests according to local conditions. The data is subject to some variations without notice.
