KI1590

ALUMINIUM FILTRATION FIBERGLASS

The KI 1590 is specially designed for the distribution and filtration of molten aluminum. It resists to temperatures upto 1000 °F.

APPLICATIONS

This fabric is soft and is easily shaped. It is used for the confection of filtration bags and trough socks because it allows the distribution and filtration of scories found in the molten aluminum due to its 25 hole per square inch mesh.

SPECIFICATIONS

Technical Data

Continuous Temperature	535°C (1000°F)
Brief excursion	1350°F (730°C)
Thickness	0.040"
Filtration (holes / in²)	25
Hole size	0.0264"

N.B. The information, details and values indicated are to the best of our know ledge. We recommend to conduct tests according to local conditions. The data is subject to some variations w ithout notice.
