# TXP300

## FIBERGLASS CABLES

These ropes are made from fiberglass yarns of 6 to 9 microns in diameter. They are strong, soft, flexible and resist temperatures up to 1000°F. They are suitable for numerous applications including dry sealing and fire protective uses.

### APPLICATIONS

The TXP300 glass fiber insulating ropes are used for insulating, sealing and caulking high temperature pipes and equipment. The steel mills, foundries, aluminum plants as well as mechanical contractors fully appreciate their advantages to seal pipes and joints particularly in hard to reach places.
