TXP507

TEFLON COATED FIBERGLASS

The TXP 507 is a fiberglass fabric coated with a PTFE resin on both sides. It resists well to weather changes, chemical products and to abrasion, it is easily sewn and possesses low flammability properties. It is easily cleaned and only emits very little smoke.

APPLICATIONS

Very flexible, this fabric is used for the fabrication of removable insulation blankets, protective sleeves for valves, pumps, flanges and for the protection against frost.
