TXP650

FIBERGLASS CABLES

These cables are made from high quality fiberglass texturised yarns and are designed for high temperature industrial applications. TXP650 cables are flexible, allowing them to match uneven surfaces when used as static seals. They keep their traction strength up to 1000°F and are available in round, square and rectangular braided forms.

APPLICATIONS

These cables are commonly used as static gaskets for industrial ovens, cables for crucibles (aluminum), furnaces, boilers, doors and moulds. They are completely incombustible and resist most acids and alkali.

SPECIFICATIONS

Technical Data

Diameter (Feet/Roll)	
3/16"	300
1/4"	200
3/8"	200
1/2"	200
